Danilo Batson

SOFTWARE ENGINEER

SUMMARY

A self-driven Software Engineer who intimately knows all that comes with start-up culture after launching my own nonprofit startup in 2020 after leaving the nursing field

WORK EXPERIENCE

Software Engineer

MONGOOSE RESEARCH   From - Until

-Led development on analytics for the chat product
-Planned integrations on a cross-functional agile team with design and product in producing new startup feature flags
-Developed efficient third-party integrations imports using designated API endpoints developed on the backend
-Deployed to development and production environments through Azure pipelines as part of the Mongoose CI/CD process

Software Engineer

CREDIT KEY   From - Until

-Using Jest and React frameworks, built out a test suite for the React framework UI
-Improved UX experiences such as rendering additional user data in the loan application portal
-Built UI enhancements on the loan application feature with the product team with requirements given by product manager and identified functionality improvements with the support team

Founder & Lead Engineer

SPICY GREEN BOOK   From - Until

-Identified a need to promote Black-owned businesses and launched a nonprofit entity with an online nationwide directory
-Using React Native and Vercel, built a website and mobile app to promote these businesses
-Overseeing all product and executive decisions while creating a collaborative community
-Created an open-source app repository to allow volunteering developers to add to the site and mobile applications
